

Differences Between Mobile Web Automation and Native App Automation

Aspect	Mobile Web Automation	Native App Automation
Application Type	Mobile browser (Chrome/Safari)	Installed mobile application
Automation Tool	Appium + WebDriver	Appium + UiAutomator2/XCUITest
Locators Used	HTML locators (id, name, XPath, CSS)	Mobile locators (id, accessibilityId, XPath)
Context	WEBVIEW / Browser	NATIVE_APP
Installation Required	No app installation needed	App must be installed
Performance	Faster execution	Slightly slower
Cross-Platform	Same test for Android & iOS	Platform-specific implementation
